

Z-2000 Features and Benefits

- Significant cost reduction resulting from labor elimination and improved efficiencies
- Improvement of overall line efficiencies resulting from elimination of bottle necks
- Better continuous product flow
- Eliminate use of carrier cases
- Cost benefit of more efficient utilization of C-fold film as compared to pre-made bags
- Better space utilization due to small system footprint
- Improved product quality and consistency
- High O₂ and low O₂ processing
- Residual O₂ less than 1/2% with low O₂ settings
- PLC control of gas fill rates for consistent back-flush
- Excellent ergonomics
- Consistent seal quality and O₂ levels
- Product is presented to the snorkels same way every time, giving consistent results
- Stainless steel construction
- Complete wash-down inside and out
- Clean in Place system

Industry Comes Full Circle, from Lidded Tray to Overwrap Tray

Leading retailers are switching their counter ready meat from lidded trays to traditional overwrap trays to satisfy consumer preferences. These changes have resulted in considerable increases in sales and margins.

CVP Systems has introduced its Patented Z-2000, fully automated roll-stock machine. The Z-2000 mechanically inserts various tray pack configurations into a mother-bag and vacuums, gasses and seals the bag at a rate of 12 per minute at O2 levels of less than 1/2 Percent.

CVP Systems Z-2000 MasterPACKer™ Fully Automated Case Ready Master Pack Machine

Patented by CVP Systems, Inc. under
US Patent No. 5,187,972

Payback on Investment in Less than One Year

Payback on the Z-2000 is estimated at less than one year based on the elimination of labor intensive manual handling of product as well as significant material savings.

Significant Savings per Pound

Projected Savings of Three to Five Cents per Pound are achieved with the Z-2000 as compared to the conventional method of manually loading trays into mother-bags and then running a manual vacuum/gas flush cycle.
